

## PROJECT INFORMATION

**i-Coach** is a 36-months Erasmus+ project aiming to provide SMEs with the skills and competences needed to support the implementation of successful internship programmes via an innovative training course and methodology. The project also strives to foster the return on investment to enable small companies to benefit from work-based learning (WBL) and individual interns, or to successfully integrate them into their working environment.

## WHAT WE HAVE ACHIEVED

During these past months, we've achieved the following results:

- **PR1: DESIGN OF THE I-COACH EXPERT SKILL SET PROFILE**

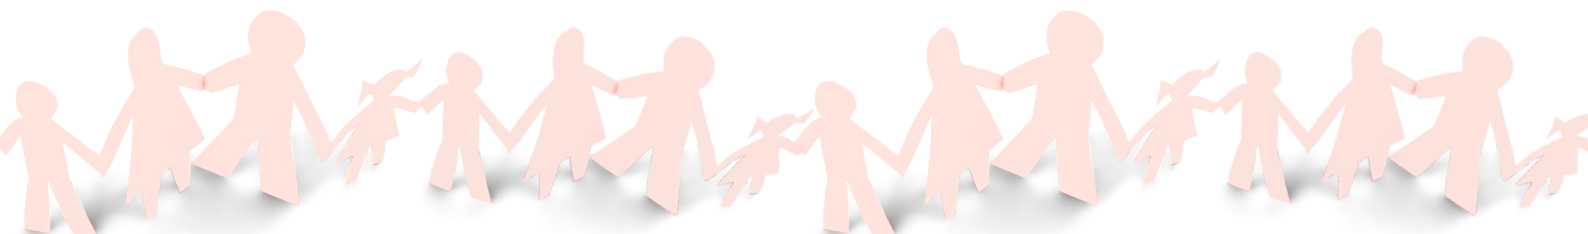

Via a mapping process, the partnership investigated and explored all relevant factors that would lead to the successful creation of the **i-Coach Expert's Profile**. This result provided the partnership with first-hand information used for the next project results.

- **PR2: DEVELOPMENT OF THE I-COACH TRAINING TOOLBOX**

Developed as an **Open Educational Resource (OER)**, the **Toolbox** included both a theoretical part of the learning content and a practical part of the training materials, which consisted of different exercises, interactive content, and case studies showing examples of successful internship programs already delivered and implemented by SMEs. In addition, it will be available through a specifically developed **e-learning platform** for at least 5 years after the project ends.

- **PR3: THE I-COACH COLLABORATION MODEL**

To test the quality and functionality of the i-Coach training course, its impact on the end users, and to provide insights for the **i-Coach Collaboration Model**, a set of piloting actions to generate participants' feedback regarding the effectiveness and the functionality of the **i-Coach Training Toolbox** was developed.
